Abstract

A METHOD OF ESTABLISHING A COMMUNICATION LINK IN A DIGITAL COMMUNICATION SYSTEM

A method of establishing a communication between at least two communication units ~~(202, 208)~~ in a digital communication system ~~(200)~~, wherein a first communication unit ~~(202)~~ operates on a long delay link and a second communication unit ~~(208)~~ operates on a short delay link, wherein transmission ~~(118)~~ of audio data blocks is delayed ~~(302)~~ on the short delay link's site.
